

ABOUT THE MAJOR

Sociology is the scientific study of society and human behavior. Through the use of both research and theories, sociologists develop understandings of complex forms of human behavior. Students in the BS degree program in Sociology have key opportunities to engage in high-impact practices like diversity and global learning courses, internships, study abroad, collaborative assignments, and conducting research with professors. Such experiences equip students with top job skills desired by today's employers, including data literacy, critical thinking, effective oral and written communication, cultural intelligence, and empathy. Upon graduation, students are prepared for advanced graduate and professional school education and for entrance into the job market in business, government, non-profit organizations, and social services work.

ABOUT THIS MAP

This program map is intended ONLY as a guide for students to plan their course of study. It does NOT replace any information in the Undergraduate Catalog, which is the official guide for completing degree requirements. Use this map to help plan and guide your experience at UWG, including academic, co-curricular, and discovery opportunities. Everyone's experience is different and activities in this map are suggestions. Always consult with your advisors whenever possible for new opportunities and updates.
